Filter-Regulator Manual

Kaveri Motion Components · Rev A, Feb 2025

Technical data

Port G1/2. Filter element 40 micron (5 micron option). Regulating range 0.5 to 10 bar. Maximum inlet pressure 16 bar. Flow 2800 Nl/min at 6 bar with 1 bar pressure drop. Semi-automatic drain. Polycarbonate bowl with metal guard: keep away from solvents and synthetic compressor oils. Output pressure creeping up indicates contamination of the regulator seat.
